DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed 11-MAR-2003 complies with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609. Accordingly, it has been placed in the application file and the information referred to therein has been considered as to the merits.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest the process of extruding a polyamide film and pressing it onto a cooling roll via an air knife, wherein an entrained air layer between the roll and film has a average thickness which is larger an the film edges than in the middle of the film.

The prior art teaches applicant's overall process (see JP 09-155952), except that of the instant distribution of widthwise air layer thickness. JP 09-155952 teaches a uniform air layer thickness. It is also noted that Heyer (US Pat. 4,255,365) suggests that the entrained air layer may be made non-uniform (3:50-60). However, no motivation is present in the prior art of record to want to form the instantly claimed non-uniform air layer thickness.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
